

# Lot 270 oak terrace preserve

This charming home is ready for construction. It has a "Lowcountry Bungalow" feel to its architecture, and it provides a lot of space and features in a modest footprint with 1578 efficient square feet total. Over and above our standard, "Green" and interiors upgrades are available, as are some financing options with terms.

The plan is very efficient and convenient in its layout. Downstairs are the "public" gathering spaces – the living and dining rooms and the kitchen, as well as an optional screened porch to the rear – and a Master Bedroom suite, with a second Master and two kids'/guest rooms/office upstairs with a roomy bathroom and plenty of storage and mechanical equipment spaces.
