

Lot 303 oak terrace preserve

This charming home is ready for construction. It has a "Lowcountry Craftsman" feel to its architecture, and it provides a lot of space and features in a modest footprint with 1550 efficient square feet total. Over and above our standard, "Green" and interiors upgrades are available, as are some financing options.

The plan is very efficient and convenient in its layout. Downstairs are the "public" gathering spaces – the living and dining rooms and the kitchen, as well as the optional screened porch shown here – and the Master Bedroom suite, with two kids'/guest rooms/office upstairs and a roomy bathroom and plenty of accessible storage and mechanical equipment spaces.

1450 5th Street W #300, N. Charleston, SC 29405
